

1) What aspects of the course and the way it was taught helped you to learn?

Everything! He is very efficient at getting to the point of what you need to know, going over how to approach math problems and then returning homework in a timely manner along with posting solutions. This guy knows his stuff! I wish my other classes at GMU and taught this well. I hope he teaches at graduate level.

2) What modifications do you suggest for the next time the course is taught?

Nothing! He's doing everything perfectly. There is nothing I see that needs improvement.
