

1) What aspects of the course and the way it was taught helped you to learn?

The course was interesting! It basically went against everything I've been taught as a Global Affairs major but it was good to see someone else's perspective and I learned a lot more about economics than I ever thought I would. Also, the topics were all very interesting and relevant.

2) What modifications do you suggest for the next time the course is taught?

Only suggestion is to choose less difficult readings. They are written in an old English & was sometimes hard for me to comprehend - besides that the class was great.
